SonoScape offers a new choice to reach an ultra-high-definition (UHD) image quality in minimally invasive surgeries. The newly launched SV-M4K30 Image Processor makes it possible to view on a much bigger screen without compromise. At a high level of vision clarity, you and the whole OR team are able to immerse yourselves in a crystal-clear world.

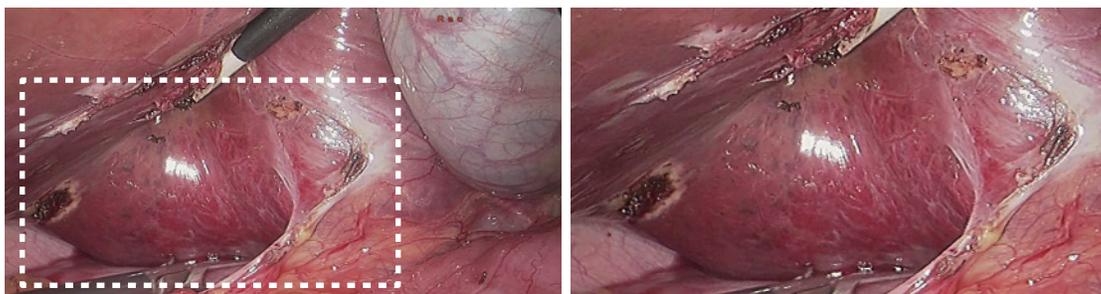

Say farewell to visible pixels

- SonoScape's 4K system supports 3840 x 2160 resolution, provides much more information than in the conventional HD
- No details are lost even if it is zoomed at 2.0X

Dare to expect more precision

- SonoScape's 4K system is equipped with VIST (Versatile Intelligent Staining Technology), a chromoendoscopy technology that combines optical and digital image processing, enhancing the details of the mucosa and the blood vessels
- High sensitivity provided by 3 CMOS cameras. The images color, edge and structure are optimized
- Dual LED light gives an ideal and bright image field
